

BORN THIS WAY

This iGreen catalog is not meant to only show you our iGreen designs but also our story and the path of this brand. What you are about to see in the following pages is created by Thema with one purpose in mind: innovating the eyeglasses concept to create something truly unique and exciting! We proudly design and manufacture our spectacles in Italy and most recently in the U.S.A., iGreen 4.0 is the ultimate result. Our customers have come to expect the upmost quality from Italy and we maintain this reputation by diligently manufacturing our spectacles at our new factory in Florida. Thank you for choosing our iGreen product and for supporting the American artisanal industry revolution.

iGreen

Hi-Tech Frames

iGreen CUSTOM

Imagine being able to wear what represents you best. Endless possibilities to express your creativity without limitations, envision yourself wearing a frame created and designed by you! Our iGreen Custom program brings this vision to life, where you are the designer of your own unique frame. We have created a program to ensure everyone has the perfect fit no matter which style they love from our 4.0 Collection and that's why we offer up to three different eye-sizes for every custom shape.

iGreen PLUS Collection

Transform everyday prescription eye-wear into protective and attractive sunglasses! Each pair comes with a polarized (grey) magnetic clip-on lens that stays in place using a strong built-in magnet discretely placed under the rivet. Four more clips are available with different lenses (Polarized Green Mirrored Lens, 3-D, Blue Lens and Yellow Lens).

Standard V-groove application is required.

iGreen Acetate Collection/ 4.0 Collection

Our iGreen Acetate frames combine the lightness of polyamide with the strength of acetate for optimal balance of comfort and function. All Acetate Styles are available for customization offering multiple eye sizes as well as nose pads. Standard V-groove application is required.

iGreen ULTEM Collection

Incredibly lightweight, flexible and equipped with a standard V- groove, the iGreen Ultem Collection is exactly what you are looking for. This versatile material is hypoallergenic, which makes it perfect for wearers with sensitive skin.

Remember:

All iGreen frames have interchangeable temples with a wide selection of colors for endless fun!

THIS IS HOW WE DO IT!

When we started producing iGreen frames in the USA, we wanted to share with the world one big dream and a message. Our product is the outcome of years of research and work. The fact that in 2018 we can still talk about "hand-made" is a reason for us to be proud. We want our customers to be able to envision what we do here in sunny Miami, and how your artistry becomes reality. With our program you are the designer with a vision and no limitations. Do you love a certain style but need a different size or wish they had nose pads? No problem! You truly are the creator of your frame, and to top it off we offer new laser engraving technology to add your name or initials. One last quality check? We strive to ensure every frame is nothing less than perfect, a last kiss goodbye and your frame is ready for you!

iGreen, The People

We used to go to an optical store and have to choose between frames that someone already designed and produced. The game has changed and we believe that you are as unique as our custom frames. Do not let others tell you what to wear, be your own designer and shine through the masses.

V 4.71

INTERCHANGEABLE CLIP-ON FRONTS

AVAILABLE FOR PL001- PL014

Mirror Green Polarized

Outstanding visual acuity for a variety of performance applications and outdoor light conditions. Selectively filters sensitive color bands while eliminating harmful light. Delivers vivid, sharp-contrast images for superior outdoor vision.

Driving (Yellow Lens Tint)

Increases contrast and reduces sharpness for maximum sight performance during low-light driving conditions. Hunters, pilots, tennis players, mountain bikers and cross country skiers preferred choice for enhanced contrast and brightness.

Office (Blue Lens Tint)

Ideal for frequent monitor/screen exposure, it provides color enhancement to reduce strain and glare. Thanks to its blue light control technology, these lens provide optimal balance for indoor/outdoor changes in visual environments.

3D

These additional clip-ons are compatible with all 3D technology displays and allow for seamless enjoyment of your 3D entertainment without sacrificing the comfort or style of your iGreen eyewear. Say good-bye to odd-looking 3D glasses!

PLUS COLLECTION

iGreen F.A.Q.s

How does the washer and screw system work?

The washer and screw system has been designed to securely hold the hinge/temple to the frame front.

How to remove and replace an iGreen hinge:

After removing the temples, gently remove all hex nuts from the frame front by using the hex nut wrench which is provided in your THEMA KIT. The hinge can then be separated from the 2 holes on the front of the frame. Carefully re-insert the new hinge into the 2 holes on front. Place the small "L" washer over the inserted threaded end piece, then the hex nut. Fully tighten hex nut to secure with the hex nut wrench.

Will iGreen frames stay in adjustment?

YES. Face form will follow the base curve of the Rx lens. It will retain that fit and adjustment.

Am I able to adjust for pantoscopic tilt?

iGREEN frames have a special stainless steel hinge which may be easily adjusted. As with all adjustments, we recommend using a nylon fiber end piece plier.

EVO COLLECTION

GETTING TO KNOW YOUR iGREEN FRAME

iGreen Eyewear is the result of years of research and development in order to produce technologically superior frames while being friendly to our environment. Thanks to Thema's investment in eco-friendly equipment and processes, iGreen frames are not only stylish, incredibly light, flexible and highly customizable but also fabricated using significantly less water and electricity during manufacture, making them a sensible and unrivaled choice in the marketplace. Since Thema's debut in the North American market a few years ago, the release of iGreen CUSTOM has truly revolutionized the manner in which the selling of eyewear is accomplished. Thema's expansion to US soil is a consequence of the major shift in how young Americans perceive quality eyewear and the increasing need to reduce the production time of custom frames.

Materials

Within the iGreen collection these frames are manufactured with the finest acetates and Ultem® 1000 which is very flexible and ultra light in weight. We have invested in a "clean" and environmentally safe production, which requires less water and less electrical energy.

Temples and Adjustability

Our frames are designed to fit like no other, but even couture eye-wear requires some adjusting: Temples can be conformed for an improved face-form fit. It is important to only use small, gentle adjustments to avoid overheating the frame. Our temples are specifically designed with embedded metal core to maximize support and comfort. These do not require heat to bend and are extremely easy to adjust by hand.

Cleaning

As with all frames, alcohol should not be used to clean frames or lenses. Warm water and mild soap may be used, however, we recommend our iGreen Cleaning Solution for proper cleaning and maintenance, which we offer in a box of 12 bottles (2oz per bottle). Please note, cleaning products containing even small quantities of alcohol or other solvents may damage the surface of the frame.

Lens Material

We recommend to use Aspheric polycarbonate, Trivex and Hi-Index. iGreen ACETATE and CUSTOM frames have no limits with regard to the maximum lens power, except for "visual aesthetics" - which is extremely subjective. Lenses should not be cut over-sized. Trace and edge on size, accounting for the calibration of your edger. Over-sized lenses may warp or pop out of the frame and create pressure on the eye rim.

Extra Temples

Temples are available in 3 different lengths: 130, 135 and 143mm. Some of the temples are available in a matte and shiny finish. Temples are interchangeable from frame to frame and it is easily done to personalize any iGreen frame.
